## Introduction

So, you've decided you want to be your own boss and work as a freelance web designer. Congratulations! By purchasing this toolkit you've already made a smart business decision and put yourself way ahead of any potential competition. Your efforts go applauded, well done.

Taking the first steps towards self employment or freelancing can be a difficult and uncertain time, especially if you have no business experience at all. You may have the required technical skills and the talent, but how do you start, or run a web design business?

The information in this business toolkit is essentially to assist you with every aspect of what it takes to build and operate your very own successful web design business. In addition to this, you'll also discover the insider secrets from an experienced freelance web developer of almost 10 years.

So whether it be acting as a sole trader working from a home based office, or building a team of professionals in your own office space and offering various services of expertise. Whatever the reasons for you wanting you start your own business, I hope the information found in this toolkit helps you achieve your goals and ambitions.
